Viafix Quick Cold Storable HRA 15/10 (AKA sand-carpet)

Viafix reactive binder enables replacement of traditional hot binders to duplicate most grades of asphalt into cold, hand-layable equivalents, storable and ready to use in 25kg bags. All Viafix cold mixes comply with SROH coring requirements.

Viafix Quick HRA 15/10 (AKA sand-carpet) is perfect for smaller first time permanent reinstatements during out-of-hours / foul weather conditions. No hot crews or hot works permissions or fair weather required. As with all Viafix products our cold mixes can be laid in or underwater and trafficked immediately and are easily worked and compacted in low temperatures.
