Viafix Quick is the highest performing, fastest laid, permanent, cold asphalt repair system in the world. It comes ready to use and cures in contact with water or moisture. Viafix can be placed into a flooded pothole and left for compaction by immediate trafficking; with absolutely no rutting or sticking to tyres. Repairs can also be carried out underwater and at temperatures down to -15°C with no issues of poor pliability.

The longevity, quality, and cost efficiency of Viafix is far superior to that of any other cold asphalt repair product on the market. Viafix has zero toxins or solvents and no COSHH issues.

Viafix can also be used for first visit permanent reinstatements in footways and carriageways, in compliance with SROH. Thanks to its design for wet and cold application and its incredible winter performance it can be used for unquestionably permanent, one visit reinstatements; precluding the need for hot works teams and equipment.

All of these claims can be proven with a completely free, very fast, no obligation demonstration. Any subsequent orders will be backed by a 100% money back guarantee. Google search "Viafix" for international news items and videos. To arrange a free demonstration please contact 01761 415804
